

When reference-conditioned retrieval fails

OUTCOME-0203 | H593 development panel | COST1 | Uncorrected: wrong HOLD

Query (complete input image)

Paired with final incorrect reference

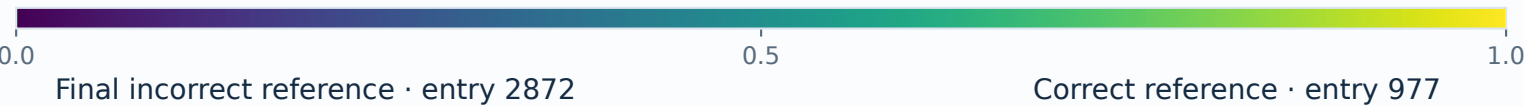

S = 0.00054 M = 0.02009

Paired with the correct reference

S = not computed M = not computed

RAW incorrect → COST1 incorrect

Decision: HOLD | Target outside C128 (retrieval miss)
RAW entry 2872 → final entry 2872

Action utility: final 0.0000; target not scored
S: weighted content; M: joint visibility mass
HOLD utility = 0. The head uses multiple signals.
