

# When reference-conditioned retrieval fails

OUTCOME-0413 | H593 development panel | COST1 | Uncorrected: wrong HOLD

Query (complete input image)

Paired with final incorrect reference

S = 0.00415    M = 0.03490

Paired with the correct reference

S = not computed    M = not computed

## RAW incorrect → COST1 incorrect

Decision: HOLD | Target outside C128 (retrieval miss)  
RAW entry 3250 → final entry 3250

Action utility: final 0.0000; target not scored  
S: weighted content; M: joint visibility mass  
HOLD utility = 0. The head uses multiple signals.
