

When reference-conditioned retrieval fails

OUTCOME-0473 | H593 development panel | COST1 | Uncorrected: wrong HOLD

Query (complete input image)

Paired with final incorrect reference

S = 0.00189 M = 0.04231

Paired with the correct reference

No cached target-pair map

Correct reference is outside C128
This pair was not scored

S = not computed M = not computed

RAW incorrect → COST1 incorrect

Decision: HOLD | Target outside C128 (retrieval miss)
RAW entry 3261 → final entry 3261

Action utility: final 0.0000; target not scored
S: weighted content; M: joint visibility mass
HOLD utility = 0. The head uses multiple signals.
