

When reference-conditioned retrieval fails

OUTCOME-0807 | H593 development panel | COST1 | Uncorrected: wrong HOLD

Query (complete input image)

Paired with final incorrect reference

S = 0.00087 M = 0.02309

Paired with the correct reference

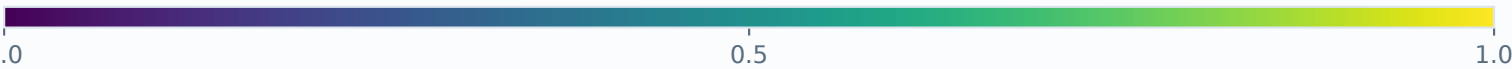

S = not computed M = not computed

RAW incorrect → COST1 incorrect

Decision: HOLD | Target outside C128 (retrieval miss)
RAW entry 1243 → final entry 1243

Action utility: final 0.0000; target not scored
S: weighted content; M: joint visibility mass
HOLD utility = 0. The head uses multiple signals.

Final incorrect reference · entry 1243

Correct reference · entry 499
